1. Introduction

- 1.1 Records management is the process by which Nottingham and Nottinghamshire ICB (hereafter referred to as 'the ICB') manages all aspects of its record keeping, whether internally or externally generated, and in any format or media type, from their creation, all the way through their lifecycle and to their eventual destruction.
- 1.2 The ICB is dependent on its documents and records to operate efficiently and account for its actions. Information is a corporate asset and the ICB's records are important sources of administrative, evidential and historical information. They are vital to the ICB to support current and future operations, for the purposes of accountability and transparency, and for an awareness and understanding of its history and procedures.
- 1.3 The ICB has a statutory obligation under the Data Protection Act 2018, General Data Protection Regulation (GDPR) and the Freedom of Information Act 2000, to maintain accurate records of its activities and to make arrangements for their safekeeping and secure disposal. All records created in the course of ICB business are public records under the terms of the Public Records Act 1958.
- 1.4 In addition, all NHS organisations are required to work to the standards set out within the Information Governance Alliance (IGA) Records Management Code of Practice for Health and Social Care Act 2021.
- 1.5 This policy relates to all records held in any format or media by the ICB, including corporate and health records. Records should be classified as sensitive or non-sensitive in terms of their impact on the running of the business if lost or disclosed.
 - Corporate records (non-clinical) provide evidence of actions and decisions and represent a vital asset to support daily functions, operations, audit and legal requirements. Records support policy formation and managerial decision-making, protect the interests of the organisation, staff and our population. Records support consistency, continuity, efficiency and productivity and help deliver organisational priorities in consistent and equitable ways.
 - Health records (clinical) are also a key component of corporate documentation and are a vital asset to support delivery of safe and effective care to the ICB's population. Although not a provider of care, the ICB will utilise health records to deliver certain duties and responsibilities (Continuing Healthcare, safeguarding, complaints, for example) and need to manage these in line with relevant requirements of this policy (e.g. held securely).

2. Purpose

2.1. The purpose of this policy is to support the organisation in meeting its obligations in terms of legal and national guidance and to also provide effective governance arrangements for the record management function.

3. Scope

3.1 This policy applies to all ICB employees, including contractors, temporary staff, secondees and honorary employees.

4. Definitions

| Item | Definition | | |
|-----------------------|--|--|--|
| Records | Recorded information, in any form, created or received and maintained by the organisation in the transaction of its business or conduct of affairs and kept as evidence of such activity. Examples are provided at Appendix A. | | |
| Corporate Records | Records that relate to the corporate business of the ICB; examples include (not an exhaustive list): Corporate governance and assurance activities (e.g., committee minutes, action logs, risk registers, policy framework); Staffing / personnel activities (e.g., HR); Health and Safety / Facilities management; Financial management and accounting; Commissioning, procurement and contracting activities; Press / media enquiries. | | |
| Electronic Record | An electronic record is an electronic document which has been formally declared as a corporate record. A typical electronic record consists of both electronic content (one or more components) and metadata. While electronic documents can be edited and deleted, electronic records are held in a fixed state, with appropriate access and functional permissions applied. | | |
| Records Management | A discipline which utilises an administrative system to direct and control the creation, version control, distribution, filing, retention, storage and disposal of | | |

| Item | Definition |
|---------------------------------|---|
| | records, in a way that is administratively and legally sound. The key components of records management are: Record creation; Record keeping; Record maintenance (including tracking of record movements); Access and disclosure; Closure and transfer; Appraisal; Archiving; Destruction. |
| Records Life Cycle | The life of a record from its creation/receipt through the period of its 'active' use, then into a period of 'inactive' retention (such as closed files which may still be referred to occasionally) and finally either destruction, confidential destruction or archival preservation. Records Management policies and procedures form part of the information lifecycle management, together with other processes, such as, a records inventory, secure storage and records audit. |
| Folder | A folder is a container for related records. Folders (segmented into parts) are the primary unit of management and may contain one or more records (or markers where applicable). |
| Naming Convention | A naming convention is a collection of rules which are used to specify the name of a document, record or folder. |
| Classification | A systematic identification of business activities (and thereby records) into categories according to logically structured conventions, methods and procedural rules represented in a classification scheme. |
| Protective Marking | Protective marking is a metadata field applied to an object to show the level of security assigned to an object. A protective marking is selected from a predefined set of possible values which indicate the level of access controls applicable to a folder, record etc. within the file plan hierarchy. |
| Safe Transfer ('Safe Haven') | Safe Haven is a term used to explain an agreed set of arrangements that are in place in an organisation to ensure person identifiable, confidential and/or sensitive information can be received, stored and communicated |

| Item | Definition |
|-------------------|---|
| | safely and securely by FAX. The principles of Safe Haven can be transferred and used when considering the safe transfer of personal confidential data (see the ICB's Safe Haven Procedure for further detail). |
| Disposal | The manner in which a record is disposed of after a period of time. It is the final stage of the record management in which a record is either destroyed or permanently retained. |
| Users (End Users) | This group comprises those, at all levels of the organisation, who generate and use records in their daily activities. The end user group is a source of much or the material which constitutes the record. Since records systems tends to devolve control to end users at the time of record capture, sound advice and guidance to this group is critical for the maintenance of the quality and accountability. |

5. Roles and Responsibilities

| Role | Responsibilities |
|---|--|
| Chief Executive | The Chief Executive has overall accountability for records management in the organisation. |
| Director of Corporate Affairs | The Director of Corporate Affairs is responsible for ensuring that appropriate mechanisms are in place to support service delivery and continuity. Records management is integral to this as it will ensure appropriate and accurate information is available as required. |
| Senior Information Risk Officer (SIRO) | The SIRO is responsible for ensuring that national guidance on the handling and management of information is adhered to. The SIRO is responsible to the Integrated Care Board for ensuring that all information risks are reported and mitigated where possible. |
| Caldicott Guardian | The organisation's Caldicott Guardian is responsible for ensuring that national guidance on the handling of patient identifiable information is applied across |

| Role | Responsibilities | | |
|---|---|--|--|
| | the organisation and is only shared in an appropriate and secure manner. | | |
| Head of Corporate Assurance (supported by the Corporate Assurance Team) | The Head of Corporate Assurance is operationally responsible for this policy and is responsible for the overall development and maintenance of the records management system. This role also provides guidance to staff on legal requirements and good practice in relation to records management (e.g. file structures and record naming). | | |
| Associate Directors / Senior Managers | The responsibility for local records management is devolved to the relevant Associate Director / Senior Managers within the organisation. Managers have overall responsibility for the management of records generated by their activities, e.g. for ensuring that records controlled within their areas are managed in a way which meets the aims of this policy. | | |
| Information Asset Owner (IAO) | A senior member of staff who is the nominated owner for one or more identified information assets of the organisation. It is a core information governance requirement that all Information Assets are identified and that the business importance of those assets is established. | | |
| Information Asset Administrator (IAA) | An operational manager who is familiar with information risks in their business area. Their primary role is to support the IAO to fulfil their responsibilities and ensure that policies and procedures are followed, recognise actual or potential serious incidents, consult with their IAO on incident management and ensure that information asset registers are accurate and up-to-date. | | |
| All Staff | Under the Public Records Act 1958, all NHS employees are responsible for any records which they create or use in the course of their duties. Therefore, any records created by an employee of the NHS are public records and may be subject to both legal and professional obligations. Individuals must ensure that they keep appropriate records of their work in the ICB and manage those records in keeping with this policy and with any guidance subsequently produced. | | |

| Role | Responsibilities |
|----------------------------|---|
| SharePoint Site Owners | When a SharePoint Site, Teams Sites, or Private Teams Channel is set up. Owners have responsibility for: |
| | Adding or removing members; The veracity of information stored with the site that own; Controlling membership access and security permissions. Ensuring that access membership and security permissions are regularly reviewed. |
| SharePoint Site Members | Members are regular users who have been added to a SharePoint Site, Teams Sites, or Private Teams Channel by the owner. Members can use all the functions to collaborate on the platform and have access to everything granted to them by owners, however, they cannot change settings. |
| Guests | A guest on the N365 shared tenant platform lets staff collaborate with experts, partners, vendors, suppliers, and consultants outside of the organisation. Guest access must be managed carefully and regularly reviewed by the site owner. |

6. Record Creation and Classification

- 6.1. Record creation is one of the most important processes in records management and all staff within the organisation should aim to create good records that can be used in an effective manner.
- 6.2. It is important that records are kept in context and the best way to achieve this is to 'file' or 'classify' them. Records cannot be tracked or used efficiently if they are not classified or have been classified inappropriately.
- 6.3. NHS Digital introduced the Government Security Classification Scheme (GSCS) to ensure that the applicable and relevant security controls are set in place in line with the Department for Health, the wider NHS, health and social care and HMG requirements. For further details of the Classification of NHS Information Marking Guidance, see **Appendix B**.
- 6.4. Records captured or filed in a corporate filing system must be regarded as authentic or reliable. A common format for the creation of records will ensure that those responsible for record retrieval are able to locate records more easily (e.g. standard

- naming convention¹ and version control). Where appropriate, documents should be given a review date (e.g. corporate policies).
- 6.5. To ensure quality and continuity of operational services, all records should be kept accurate and up to date. All ICB staff who are responsible for recording information in both paper and electronic format must ensure they fully understand their responsibilities as set out in this policy and remember that records may be used in a court of law.

7. Aims of the ICB's Records Management System

- 7.1 Records management plays an integral role within the organisation and ensures that the ICB is complying with legislation and best practice, whilst working in a way that ensures that information is stored, used and accessed appropriately.
- 7.2 The aims of the ICB's Records Management System are to ensure that:
 - The correct records are readily available when needed so that staff are able to access information when needed (as appropriate) and that the organisation is able to form a reconstruction of activities or events that have taken place. Records, and the information within them, should be located and displayed in a way consistent with its use, and the current version should be clearly identifiable where multiple versions exist.
 - Records can be interpreted the context of the record should be easily
 understood. It is important that records clearly demonstrate who created or
 added to the record and when, during which business process, and how the
 record is related to other records.
 - **Records can be trusted** the record reliably represents the information that was actually used in, or created by, the business process, and its integrity and authenticity can be demonstrated.
 - Records can be maintained through time the qualities of availability, accessibility, interpretation and trustworthiness can be maintained for as long as the record is needed, despite changes of format.
 - Records are secure records are protected from unauthorised or inadvertent
 alteration or erasure and that access and disclosure are properly controlled and
 audit trails will track all use and changes. To ensure that records are held in a
 robust format which remains readable for as long as records are required.
 - Records are retained and disposed of appropriately using consistent and documented retention and disposal procedures which are in line with the

¹ A naming convention is a common set of rules or guidelines to apply to the naming of electronic records. Staff should give a unique name to each record which is meaningful and reflects the record's content. Naming should be similarly structured where records are linked (e.g. previous versions).

requirements of the IGA Records Management Code of Practice for Health and Social Care Act 2021.

- **Staff are trained** so that all staff are made aware of their responsibilities for record-keeping and record management.
- Permissions are correct file permissions must be correct and kept up to date
 following staff leaving the organisation or transferring to a different team within
 the organisation. For records stored in Office 365, site owners must ensure that
 the security permissions are up to date and appropriate. For further advice,
 please contact the Corporate Assurance Team via email on <a href="mailto:nnicb-n

8. Records Maintenance and Storage (Electronic and Hard Copy Records)

8.1 All staff (as defined within the scope of this policy) have a duty for the maintenance and protection of records they use or create.

Referencing

Each Directorate should establish and ensure compliance to a document referencing system that meets its business needs and is easily understood by staff members that create, file or retrieve records held in any media. Several types of referencing can be used, e.g., alpha-numeric, alphabetic, numeric or keyword.

The most common of these is alpha-numeric, as it allows letters to be allocated for a business activity, e.g., HR for Human Resources, followed by a unique number for each electronic record or document created by the HR function. It may be more feasible in some circumstances to give a unique reference to the file or folder in which the records are kept, and identify the record by reference to date and format.

Naming

Each Directorate should nominate staff to establish and document file naming conventions in line with national archives advice; i.e.

- Give a unique name to each record;
- Give a meaningful name which closely reflects the records content;
- Express elements of the name in a structured and predictable order;
- Locate the most specific information at the beginning of the name and the most general at the end; and

 Give a similarly structured and worded name to records which are linked (for example, an earlier and a later version).

Security Classification

Emails and documents containing sensitive information (e.g. information that could have damaging consequences is it were lost, stolen or published in the media) should be marked as "Official – Sensitive" (in line with Cabinet Office Government Security Classifications guidance 2018). Such documents include the ICB incident Response Plans; EPRR Policy or documents relating to the ICB response to a major incident.

Indexing and Filing

Each Directorate should establish and document a clear and logical filing structure that aids retrieval of records.

The register or index is a signpost to where paper corporate records are stored, (e.g., the relevant folder or file), however, it can be used as a guide to the information contained in those records. The register should be arranged in a user friendly structure that aids easy location and retrieval of a folder or file. Folders and files should be given clear logical names that follow the organisation's or directorate's naming convention.

The filing structure for electronic records should reflect the way in which paper records are filed to ensure consistency. Filing of corporate records to local drives on PCs and laptops is not appropriate. Files must be saved to the departmental network (via Shared Drives or SharePoint), to ensure only authorised access is available and that appropriate backups are taken.

Likewise, the filing of key organisational paper records or clinical records in desk drawers is not appropriate, departmental accessible secure storage should be used.

Version Control

A system of version control must be implemented to enable staff to know that they are working the latest/correct version of the documentation. This may be in the form of a version number and date or by use of document creation date.

- 8.2 The identification and safeguarding of vital records is necessary for business continuity and will be included as necessary in business continuity plans.
- 8.3 It is important that the ICB has robust 'tracking and tracing' procedures to provide an audit trail of the movement and location of records. The ICB will maintain an

- information asset register that clearly identifies business critical information assets (in relation to both electronic and hard copy records) and the safeguards and controls in place to protect them.
- 8.4 Personal confidential information should only be moved outside NHS premises with explicit approval from the ICB's Caldicott Guardian.
- 8.5 Records containing person identifiable data or corporate sensitive information must be stored securely in accordance with Data Protection Act 2018.
- 8.6 The movement and location of paper records should be controlled to ensure that a record can easily be retrieved at any time. This will enable the original record to be traced and located if required.
- 8.7 Final versions of corporate documents will be included on the ICB's local Intranet site to ensure that all staff can have access to the approved versions of policies and corporate documents. This will support compliance with the Freedom of Information Act 2000.
- 8.8 The records storage areas must comply with health and safety and fire regulations and be considered in accordance with any confidentiality and access issues.

9. Office 365 Applications and OneDrive

- 9.1 The ICB utilises Office 365 applications which allows individuals and teams to store records. Microsoft Office is operated and used in accordance with a set of national policies and procedures:
 - Microsoft Teams Apps Security and Compliance
 - Policy NHSmail Support
- 9.2 Records stored in Office 365 applications are subject to FOI and must be located and easily retrievable when requested under the FOI Act.
 - Your personal OneDrive is to be used for your personal documents only and you have 2GB storage limit.
 - A personal OneDrive should not be used for the storage of corporate records or personal identifiable data.
 - A personal OneDrive should not be used to store anything inappropriate; for example, music/movie files, an excessive number of digital images, etc.

10. Legal and Professional Obligations

10.1 All NHS records are Public Records under the Public Records Act 1958. The organisation will take actions as necessary to comply with the legal and professional

obligations as set out in the IGA Records Management Code of Practice for Health and Social Care Act 2021, in particular:

- The Public Records Act 1958;
- The Data Protection Act 2018;
- The Freedom of Information Act 2000;
- Human Rights Act 1998;
- General Data Protection Regulation (GDPR);
- The Common Law Duty of Confidentiality;
- The NHS Confidentiality Code of Practice;
- NHS Digital Data Security and Protection Toolkit;
- Cabinet Office Government Security Classifications guidance 2018;

and any new legislation affecting records management as it arises.

11. Retention and Destruction Schedule

- 11.1 It is a fundamental requirement that all of the organisation's records are retained for a minimum period of time for legal, operational, research and safety reasons. The length of time for retaining records will depend on the type of record and its importance to the ICB's business functions.
- 11.2 Keeping unnecessary records uses up valuable space and can incur unnecessary costs. It can also cause problems when trying to retrieve important information, for example, when servicing a request made under the Freedom of Information Act 2000.
- 11.3 Information Asset Owners play a critical role in ensuring that records are managed and protected. Owners should ensure these are regularly reviewed and kept up to date.
- 11.4 The ICB will adhere to the retention and disposal periods as set out in the Information Governance Alliance (IGA) Records Management Code of Practice for Health and Social Care Act 2021. Retention periods for different types of records relating to health and care can be found using the Retention Schedule Tool.
- 11.5 A retention period does not automatically result in an action, rather, it is a trigger to review. When the retention period is reached, a decision shall be taken to perform one of the following actions (as per the disposal actions set out in the IGA Records Management Code of Practice for Health and Social Care Act 2021):
 - Securely destroy content, where there is no continuing administrative, legal, financial, business or historical / research importance;

- Retain, because it is still needed within the organisation (and assign a new retention/review point); or
- Transfer records of historic value, to an appropriate archive (normally The National Archives).
- 11.6 A local retention and disposal schedule for any records which are not listed in the current version of the IGA Records Management Code of Practice will be agreed by the ICB's Information Governance Steering Group.
- 11.7 All records which are to be disposed of must be destroyed in a secure manner to ensure the information illegible and irretrievable.
- 11.8 It can be a criminal offence to destroy information; therefore, the organisation needs to be able to clearly demonstrate that records destruction has occurred appropriately.
- 11.9 The Corporate Assurance Team will hold a central record of documents that have been destroyed under this policy and any records that require keeping beyond their scheduled disposal dates. The record will include the document reference, description and date of destruction.
- 11.10 Further advice and guidance in relation to any of these points this can be obtained from the Head of Corporate Assurance.

12. Transfer to Archives under the Public Records Act

- 12.1 Records which hold historic value and have been identified as being required to be permanent should have a clearly documented rationale for keeping beyond their scheduled disposal date.
- 12.2 Transfer to The National Archives under the <u>Public Records Act</u> will normally take place in the year following their 20-year anniversary, however, they can be transferred earlier where appropriate e.g. organisational websites.

13. Exceptions to the Default Standard Retention Periods

- 13.1 This policy allows for the identification and agreement of exceptions for shorter or longer retention periods. Such exceptions must demonstrate proper rationale and ensure compliance with legislative and regulatory obligations, best practice standards and operational ICB requirements.
- 13.2 Document Preservation Notices are used where corporate records must be retained to provide the fullest support and transparency to any request for information in support of a public enquiry or other investigation. If a Document Preservation Notice has been implemented for the documents that your team holds, please contact the Corporate Assurance Team for support.

14. Equality and Diversity Statement

- 14.1 The ICB pays due regard to the requirements of the Public Sector Equality Duty (PSED) of the Equality Act 2010 in policy development and implementation as a commissioner and provider of services as well as an employer.
- 14.2 The ICB is committed to ensuring that the way we provide services to the public and the experiences of our staff does not discriminate against any individuals or groups on the basis of their age, disability, gender identity (trans, non-binary), marriage or civil partnership status, pregnancy or maternity, race, religion or belief, gender or sexual orientation.
- 14.3 The ICB is committed to ensuring that its activities also consider the disadvantages that some people in our diverse population experience when accessing health services. Such disadvantaged groups include people experiencing economic and social deprivation, carers, refugees and asylum seekers, people who are homeless, workers in stigmatised occupations, people who are geographically isolated, gypsies, Roma and travellers.
- 14.4 As an employer, the ICB is committed to promoting equality of opportunity in recruitment, training and career progression and to valuing and increasing diversity within our workforce.
- 14.5 To help ensure that these commitments are embedded in the ICB's day-to-day working practices, an Equality Impact Assessment has been completed for, and is attached to, this policy.

15. Communication, Monitoring and Review

- 15.1 The ICB will establish effective arrangements for communicating the requirements of this policy and will provide guidance and support to line management in relation to their responsibilities.
- 15.2 The ICB will annually complete a survey or audit of their records to ensure they understand the extent of their records management responsibilities (Information Flows Mapping and Audit, as required by the Data Security and Protection Toolkit).
- 15.3 This policy will be reviewed by the author every three years (or sooner if new legislation, codes of practice or national standards are to be introduced), and be endorsed by the Information Governance Steering Group prior to approval from the Audit and Risk Committee.
- 15.4 Any individual who has queries regarding the content of this policy, or has difficulty understanding how this policy relates to their role, should contact the policy authors.

16. Staff Training

16.1 All staff will be made aware of their responsibilities for records management and Information Governance through the organisation's induction programme and mandatory training requirements.

17. Interaction with other Policies

- 17.1 This policy should be read in conjunction with the following ICB documents (where relevant).
 - Information Governance Management Framework;
 - Policy on the Development and Management of Policy Documents;
 - Freedom of Information (FOI) and Environmental Information Regulations (EIR) Policy;
 - Information Security Policy;
 - Confidentiality and Data Protection Policy.

Appendix A

Examples of Records and Formats (to be managed in line with the Records Management Code of Practice for Health and Social Care 2021)

Functions:

- Administrative records (including e.g. personnel, incident report forms and risk assessments, estates, financial and accounting records, notes associated with complaint-handling).
- Audio and video tapes, cassettes, CD-ROM.
- Computer databases, output, and disks etc., and all other electronic records.
- Computerised records.
- Data processed for secondary purposes. Secondary use is any use of person level or aggregate level data that is not for direct care purposes. This can include data for service management, research or supporting commissioning decisions.
- Emails.
- Letter to and from other health professionals (primary or secondary care).
- Material intended for short term or transitory use, including notes and 'spare copies' of documents.
- Microfilm.
- Patient health records of all types (electronic or paper based).
- Photographs, slides or other images.
- Scanned records.
- Tape recordings of telephone conversations.
- Text messages and social media.
- · Websites and intranet sites.

(This list is not exhaustive).

Appendix B

Classification of NHS Information - Marking Guidance

NHS CONFIDENTIAL: Appropriate to paper and electronic documents and files containing person-identifiable information, including service users, staff and any other sensitive information.

NHS PROTECT: Discretionary marking that may be used for information classified below NHS Confidential level, but requiring care in handling. Descriptors may also be used as required.

NHS OFFICIAL: Appropriate to paper and electronic documents and files containing sensitive information (e.g. information that could have damaging consequences if it were lost, stolen or published in the media).

| Table of descriptors | that may be used with 'NHS CONFIDENTIAL' or 'NHS PROTECT' | | |
|----------------------|---|--|--|
| Category | Definition | | |
| Appointments | Concerning actual or potential appointments not yet announced. | | |
| Barred | Where: (a) there is a statutory (Act of Parliament or European Law) prohibition on disclosure, or (b) disclosure would constitute a contempt of court (information the subject of a court order). | | |
| Board | Documents for consideration by an organisation's Board of Directors, initially in private. (Note: This category is not appropriate to a document that could be categorised in some other way). | | |
| Commercial | Where disclosure would be likely to damage a (third party) commercial undertaking's processes or affairs. | | |
| Contracts | Concerning tenders under consideration and the terms of tenders accepted. | | |
| For Publication | Where it is planned that the information in the completed document will be published at a future (even if not yet determined) date. | | |
| Management | Concerning policy and planning affecting the interests of groups of staff. (Note: Likely to be exempt only in respect of some health and safety issues.) | | |
| Patient Information | Concerning identifiable information about patients. | | |
| Personal | Concerning matters personal to the sender and/or recipient. | | |
| Policy | Issues of approach or direction on which the organisation needs to take a decision (often information that will later be published). | | |
| Proceedings | The information is (or may become) the subject of, or concerned in, a legal action or investigation. | | |
| Staff | Concerning identifiable information about staff. | | |

Additional Equality Impact Assessment Supporting Information

- 1. **Disability** refers to anyone who has: "...a physical or mental impairment that has a 'substantial' and 'long-term' negative effect on your ability to do normal daily activities..." (Equality Act 2010 definition). This includes, but is not limited to: mental health conditions, learning disabilities, intellectual disabilities, neurodivergent conditions (such as dyslexia, dyspraxia and dyscalculia), autism, many physical conditions (including HIV, AIDS and cancer), and communication difficulties (including d/Deaf and blind people).
- 2. **Gender**, in terms of a Protected Characteristic within the Equality Act 2010, refers to: "A person has the protected characteristic of gender reassignment if the person is proposing to undergo, is undergoing or has undergone a process (or part of a process) for the purpose of reassigning the person's sex by changing physiological or other attributes of sex."
- 3. **Race**, in terms of a Protected Characteristic within the Equality Act 2010, refers to: A person's colour, nationality, or ethnic or national origins. This also includes people whose first spoken language is not English, and/or those who have a limited understanding of written and spoken English due to English not being their first language.
- 4. **Religion and Belief**, in terms of a Protected Characteristic within the Equality Act 2010, refers to: Religion means any religion and a reference to religion includes a reference to a lack of religion. Belief means any religious or philosophical belief and a reference to belief includes a reference to a lack of belief.
- 5. **Sex**, in terms of a Protected Characteristic within the Equality Act 2010, refers to: A reference to a person who has a particular protected characteristic and is a reference to a man or to a woman.
- 6. **Sexual Orientation**, in terms of a Protected Characteristic within the Equality Act 2010, refers to: Sexual orientation means a person's sexual orientation towards persons of the same sex, persons of the opposite sex or persons of either sex.
- 7. The **Human Rights Act 1998** sets out the fundamental areas that everyone and every organisation must adhere to. In relation to health and care, the most commonly applicable of the Articles within the Human Rights Act 1998 include: Article 2 Right to Life, Article 5 Right to Liberty and Security, Article 8 Right to Respect of Private and Family Life, and Article 9 Freedom of Thought, Conscience and Religion.
- 8. **Community Cohesion** is having a shared sense of belonging for all groups in society. It relies on criteria such as: the presence of a shared vision, inclusion of those with diverse backgrounds, equal opportunity, and supportive relationships between individuals. **Social**

Inclusion is defined as the process of improving the terms of participation in society, particularly for people who are disadvantaged, through enhancing opportunities, access to resources, voice and respect for rights (United Nations definition). For the EQIA process, we should note any positive or negative impacts on certain groups being excluded or not included within a community or societal area. For example, people who are homeless, those from different socioeconomic groups, people of colour or those from certain age groups.

- 9. **Safeguarding** means: "...protecting a citizen's health, wellbeing and human rights; enabling them to live free from harm, abuse and neglect. It is an integral part of providing high-quality health care. Safeguarding children, young people and adults is a collective responsibility" (NHS England definition). Those most in need of protection are children, looked after children, and adults at risk (such as those receiving care, those under a DoLS or LPS Order, and those with a mental, intellectual or physical disability). In addition to the ten types of abuse set out in the Health and Care Act 2022, this section of the EQIA should also consider PREVENT, radicalisation and counterterrorism.
- 10. **Other Groups** refers to anyone else that could be positively or negatively impacted by the policy, process, strategy or service change. This could include, but is not limited to: carers, refugees and asylum seekers, people who are homeless, gypsy, Roma and traveller communities, people living with an addiction (e.g., alcohol, drugs or gambling), people experiencing social or economic deprivation, and people in stigmatised occupations (e.g., sex workers).
