Org Code	Org Name	1) What IT systems and/or digital tools does your ICS use to enable frictionless movement of staff across your ICS to allow flexible and remote working? Please state if your ICS does not currently enable this.	2) Which suppliers provide the digital communication tools that are used across the ICS to enable self-service pathways such as self-triage, referral, condition management and advice and guidance? Please state if your ICS does not currently provide some or all such digital communication tools.	3) Do your ICS-wide clinical systems meet clinical safety standards as set out by DTAC and DCB0129 and DCB0160?	4) Does your ICS have a population health management system that has a fully linked, longitudinal dataset with primary, secondary, mental health, social care and community data? If yes, please state the name of the supplier of this system.	5) Do all your ICS-wide digital transformation projects, programmes and services meet the Technology Code of Practice?	6) Does your ICS have a shared care record that adheres to Professional Records Standard Body's Core Information Standard?	6(a) Please can you also state the supplier of this shared care record, even if it does not currently adhere to the PRSB standard?
	The response is provided by Nottingham and Nottinghamshire Integrated Care Board (ICB) . Technically, the ICB doesn't hold any contracts directly for digital products or services linked to Shared Care Records or Communications tools. These are all held by organisations within the integrated care 'system' in line with the ICS DAIT Strategy (https://digitalnotts.nhs.uk/our-strategy/). In the interest of openness and transparency we've added over-arching information in relation to the questions asked.	Use of N365 and Azure AD for secure B2B collaboration between local tenants/organisations.

Development a common ICS Azure tenant for the purposes of shared information.

Operate a Community of Interest WAN with local NHS organisations under singel contract, which has connectivitiy to both Council WAN's.

Operate common technology infrastructures to allow seamless secure connectivty e.g. Reciprocal WiFi SSID publishing.

VDI technologies.

VPN remote access.

High adoption of Teams a default communication method.

VoIP telephony platform with softphones.

Shared Print Solutions, Partner Print.

Alignment of key digital systems where possible. | The ICS have a Public facing Digital Services strategy that includes the use of the NHS App as the front end point for access as well as Patient Knows Best (PKB) which is being offered to practices as an option for them to use it for online consultations in order to meet their Contract requirement. | DTAC is followed for all new system procurements, retrospective DTAC assessments have been carried out for key clinical systems. there will be peripheral legacy systems in place that have not been through full retrospective DTAC assessment however these are deemed none vital and any plans for upgrade or replacement will meet patient safety standards. | eHealthscope | Yes | The Nottingham Shared Health & Care Record is provided by Graphnet who are part of the PRSB Standards Partnership Scheme | As stated, the product used for the system-wide shared care record is the Graphnet Carecentric solution. |
